

CROSS4HEALTH aims at unlocking the collaborative potential of the SMEs from Aerospace, Biotechnology, Energy, ICT and Medical Devices (ABEIM) sectors in generating innovative solutions, business models and work-flows that enhance patient-centered personalized care for societal challenges in health, delivered through the Medical Devices new emerging industry value-chains.

Cross4Health

1. Establishment of Open Innovation Spaces where all the involved parties set the priorities and the challenges.
2. Generation of added value, leverage of expert knowledge, new partnerships and market support.
3. Facilitation of fast testing and business hypothesis validation via large-scale demonstrators.
4. Facilitation of sustainability by validation of complementary funding streams and alignment with RIS3 strategies.
